DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 42-48, 50-52, 54-56 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 42 sets forth “memory... includes operational instructions that cause the processing module to .” Therefore the memory in the claims is interpreted as a “computer readable medium”. However, the specification as originally filed does not explicitly define [the “memory” by stating that it ‘. . . includes, and is limited to’... ‘specific storage device(s)’].

For instance, page 60, lines 15-17, states that memory 362 *may* be a single memory device or a plurality of memory devices, likewise page 130, lines 1-3 states similar scope for memory 884, emphasis added. The specification states that memory *may* be a memory device, but does not positively assert or affirm that memory is a memory device.

The United States Patent and Trademark Office (USPTO) is obliged to give claims their broadest reasonable interpretation consistent with the specification during proceedings before the USPTO. *See In re Zletz*, 893 F.2d 319 (Fed. Cir. 1989) (during patent examination the pending claims must be interpreted as broadly as their terms reasonably allow).

The broadest reasonable interpretation of a claim drawn to a [computer readable storage media] (also called machine readable medium and other such variations) typically covers forms of non-transitory tangible media and transitory propagating signals *per se* in view of the ordinary and customary meaning of computer readable media, particularly when the specification is absent an explicit definition or is silent. *See* MPEP 2111.01. When the broadest reasonable interpretation of a claim covers a signal *per se*, the claim must be rejected under 35 U.S.C. § 101 as covering non-statutory subject matter. *See In re Nuijten*, 500 F.3d 1346, 1356-57 (Fed. Cir. 2007) (transitory embodiments are not directed to statutory subject matter) and *Interim Examination Instructions for Evaluating Subject Matter Eligibility Under 35 U.S.C. § 101*, Aug. 24, 2009; p. 2.

Because the full scope of the claim as properly read in light of the disclosure encompasses non-statutory subject matter, the claim as a whole is non-statutory.

The examiner recommends the following language:

1. Modifying “computer readable storage medium”, to be “computer readable non-transitory storage medium”.
2. Modifying “memory”, to be “memory device”.
3. Adding language, “...wherein the computer readable storage medium is not a signal”.

Allowable Subject Matter

2. Claims 1-3, 5-15, 42-48, 50-52, 54-56 are allowable over prior art of record.
